Tandem Skydives

This is an excellent introduction to the sport of Skydiving. After a 20 minute brief you will be flown to an altitude of up to 13,500 feet and will leave the aircraft very securely attached to a highly qualified Tandem Instructor. Ten seconds after the exit you will be travelling at 120 mph until, at 5,000 feet, the instructor will deploy the main canopy. You will then be able to relax and enjoy a spectacular 5-minute canopy ride before a gentle landing. The maximum weight limit for Tandem Skydiving is around 15 stone (male) and 12-13 stone (female).

Tandem Skydive - £245

Accelerated Freefall

If you would like to take up skydiving then an Accelerated Freefall (AFF) course could be for you. As an introduction to the sport AFF level 1 can be offered with the option to continue and complete the course.

The AFF system consists of eight levels. For the first three levels you will be accompanied by two highly qualified AFF instructors, progressing to only one instructor for the next four levels followed by a graduation jump on your own. All of your jumps will be recorded using digital video (where available). Once you have successfully completed the AFF course you will be qualified to jump on your own.
